World Food India 2017

World Food India intends to establish global linkages and facilitate foreign investment in India's US\$ 915 billion farm-to-fork ecosystem that services the needs and rising aspirations of the country's 1.3 billion consumers.

As the world looks for new growth opportunities, World Food India serves it on a platter. World Food India is designed to offer an unusual peek into India's food and culture as well as opportunities to invest and prosper from one of the world's largest consumer markets. India is the world's oldest continuing civilization and has served the world's tastes from Mesopotamia and the Pharaohs of Egypt to ancient China and beyond. Much of India's historic exports have been processed food, spices, derivatives and additives.

Today, India is the fastest growing economy in the world and is home to over 1.3 billion people. The country's rising disposable income has fuelled the growth of the world's largest consumer market. India needs much more resources to cater to the rising aspirations of its people. The country is amongst the largest producers and consumers of food in the world opening up huge opportunities for specific post harvest management technology suppliers, cold chain infrastructure and refrigerated transport players to process food produce and for retail chains. World Food India strives to attract the world's best food processing companies and give them a golden opportunity to harvest growth and reap profits from the world's fastest growing economy.

Who Should Attend?

- Post harvest technology providers
- Cold chain infrastructure players
 - Food technologists
- Food processing & packaging companies
- Logistics players in the food chain business
